## Stroke Corner Video Abstract: JNPT Article: Fluid Cognition Relates to Locomotor Switching in Neurotypical Adults, Not Individuals After Stroke

Don't miss [this article](#) out in the latest issue of the Journal of Neurologic Physical Therapy: **Fluid Cognition Relates to Locomotor Switching in Neurotypical Adults, Not Individuals After Stroke** by Margaret French and colleagues.

Authors examined relationships between fluid cognition and locomotor switching, or the ability to switch between walking patterns, which is essential for community mobility. The authors found that "the ability to switch between walking patterns (ie, locomotor switching) is vital for successful community navigation and may be impacted by poststroke impairments" and "the relationship between fluid cognition and locomotor switching was significant in neurotypical adults but not in individuals after stroke."

Dr. French also provides a video abstract to summarize the article, which you can watch [here](#), or click on the button below:

## **Additional Clinical Resources: Neurologic Telehealth**

### **Looking for resources to help you treat via Telehealth?!**

The Academy of Neurologic Rehabilitation has developed national campaigns and task forces to assist in the dissemination and implement the best available evidence in neurologic rehabilitation. The Neurologic Telehealth Task Force is gathering resources for clinicians who are treating patients through telehealth and has posted the first Neuro Telehealth Abstract of the Month. Look for this feature every month, in addition to a monthly podcast over at the Neuro Telehealth Website. While there,
